

**Consolidated Communications Network of Colorado, Inc.**

March 6, 2009

To the General Membership of the Consolidated Communications Network of Colorado, Inc.:

It is with great pleasure that the CCNC Executive Board announces the integration of the statewide Digital Trunked Radio (DTR) system with the Pikes Peak Regional Communications Network (PPRCN).

This year-long effort and collaboration between members from both the CCNC and the PPRCN has been instrumental in promoting a partnership that will enable both networks to be integrated providing seamless interoperable communications for responders in the El Paso County region and statewide.

Upgrade of the PPRCN to the Astro 25 SR7.5 and integration to DTR will occur in July, 2009. Continuous planning for upgrade, integration and radio re-programming will occur over the next few months. A special thanks to those agencies donating their time and resources to ensure the success of this effort.

Thank you,

Steve West, President  
CCNC  
Elbert County Communications

Jeff Vaughn, Vice-President  
CCNC  
Douglas County Sheriff's Office

Kim Coleman, Board Member  
CCNC  
DTR Project Manager  
Governor's Office of Information Technology
